

# Covid catch up funding: 16-19

SAMUEL WARD

We will use this funding to ensure that students opportunities are not limited by the impact of Covid. That includes but it not limited to:

- Funding extra trips and visits to higher education institutions, apprenticeship providers and employers
- Providing IT support to those students who need it, including Wi-Fi access
- Providing extra hours of counselling support where it would be most beneficial
- Supporting students with travel costs to visit universities, colleges and employers where the impact of Covid has limited their ability to fund that themselves
- Responding flexibly to individual requests for funding from a 16-19 student support fund, in addition to any bursary payments students may receive
- Providing one to one of small group tutoring to support students in embedding insecure learning.
